chchiru236@gmail.com | +91 9392997360

CAREER OBJECTIVE

Data-driven graduate eager to tackle complex challenges and create innovative solutions. Passionate about using AI/ML to drive real-world impact. Looking to join a dynamic team and contribute to cutting-edge projects.

EDUCATION

AUDISANKARA COLLEGE OF ENGINEERING & TECHNOLOGY

Gudur, Andhra Pradesh, India

Bachelor of Technology in Computer Science & Artificial Intelligence

Grad. 2024 | GPA: 8.15/10.0

AMARAVATHI JR. COLLEGE.

Venkatagiri, Andra Pradesh, India.

Intermediate (MPC).

Grad. 2020 | GPA: 8.29 / 10.0

ZP HIGH SCHOOL FOR BOYS

Venkatagiri, Andra Pradesh, India.

Secondary School Certificate.

Grad. 2018 | GPA: 7.8 / 10.0

TECHNICAL SKILLS

Programming Languages: Python, SQL, C, Java, HTML, CSS, JavaScript

Machine Learning & AI: Regression & Classification Models (Linear, Logistic, SVM, Random Forest, Naive Bayes, KNN, XGBoost, Lasso & Ridge Regression), Hyperparameter Tuning, Cross-Validation, Gradient Descent, ANN, CNN, RNN, LSTM, Transformer Models, YOLO Object Detection, LLM Integration

Data Visualization: Tableau, Power BI, Spotfire, Matplotlib, Seaborn, Pandas, Geographic Plots

Database Management: MySQL, SQLite, DBeaver, pgAdmin, SQL (Advanced Query Writing, Joins, Views, Entity-Relationship)

Libraries & Tools: Numpy, Pandas, Scikit-learn, TensorFlow, OpenCV, NLTK, Keras, PySpark, Hugging Face, Cython, Talend

Neural Networks: ANN, CNN, RNN, LSTM, Activation Functions (ReLU, Sigmoid, Tanh), Dropout, Batch Normalization, Optimization Algorithms (Adam, SGD)

Statistics & Mathematics: Descriptive & Inferential Statistics, Probability Distributions, Hypothesis Testing (ANOVA, t-test, Chi-Square), Confidence Intervals, Sampling, Linear Algebra, Multivariate Calculus

Web Scraping: BeautifulSoup, Requests

Development Tools: Jupyter Notebook, Google Colab, Spyder, Visual Studio, PyCharm, VS Code

PERSONAL PROFILE

Nationality: Indian

Gender: Male

Relationship status: single

Date of Birth: 23-06-2003

Blood Group: A(+ve)

Languages: English | Telugu | Hindi.

Address: 13- 273, kasipeta, Venkatagiri, Nellore, AP. (524132).

SKILLS

- Effective Communication
- Quick Learning
- Time Management
- Analytical Thinking
- Problem Solving
- Team Collaboration
- Hardworking

CERTIFICATE'S

Machine Learning – Coursera | June 2023

Oracle Cloud Data Management – Oracle |
September 2023

Cloud Computing – NPTEL | April 2024

Full Stack Data Science –ISO 9001:2000,
Naresh IT Hyderabad

HOBBIES

Traveling - Exploring new cultures and destinations.

Writing - Crafting stories and sharing experiences through words.

Version Control: GitHub

Generative AI: GEMMA Integration, Hugging Face Transformers, Large Language Models (LLMs), VQGAN, CLIP

Azure DevOps: Pipelines, Repos, Boards, Test Plans, Artifacts, Terraform, Kubernetes

Data Augmentation: Image & Text Augmentation, Image Processing, Video Analysis

INTERNSHIPS

IIDT | AI-ML Developer Intern | Jan 2024 - Apr 2024

- Optimized supply chain operations using AI/ML for IIDT BlackBucks program.
- Gained hands-on experience in applying data science to real-world challenges.

Brainovision Solutions | AWS Intern | Jul 2023 - Aug 2023

- Acquired AWS proficiency (EC2, ELB, ASG, S3, IAM, DynamoDB, API Gateway, VPC).
- Facilitated AICTE-certified internships, providing industry exposure to participants.

1 Stop | AI-ML Intern | Oct 2022 - Dec 2022

- Developed machine learning model for news classification using Python (NumPy, Matplotlib).
- Applied data analysis and visualization techniques to solve real-world problems.

PROJECTS

CREDIT CARD FRAUD DETECTION | Major Project Apr 2024

- Collaborated with a team to develop a robust credit card fraud detection model using Linear Regression, Random Forest, and XGBoost.
- Achieved high accuracy in detecting fraudulent transactions through efficient data preprocessing with Python libraries.
- Enhanced model performance by implementing feature selection and hyperparameter tuning.
- Improved fraud detection accuracy by 92% through data preprocessing and feature engineering.

WEB APPLICATION DEPLOYMENT | Minor Project Aug 2023

Technologies: AWS Cloud using DynamoDB, API Gateway, IAM, Amplify, and Lambda.

- Led AWS cloud deployment of web application using DynamoDB, API Gateway, IAM, Amplify, Lambda.
- Enhanced application scalability and security through cloud best practices.
- Reduced deployment time by 30% by streamlining cross-functional team collaboration.

AI XML TEXT PROCESSING AND SUMMARIZATION

Technologies: Python, Streamlit, NLTK, WordCloud, XML Parsing, Requests, NLP

- Developed an application leveraging NLP to extract, tokenize, and summarize text from XML files or URLs.
- Implemented a user-friendly interface for analyzing text data and generating word clouds, enhancing data insights.
- Utilized Python libraries for efficient text processing, improving summarization accuracy.

LANGUAGE CONVERTER USING GOOGLE TRANSLATOR LIBRARY

Technologies: Python, Google Translate, gTTS, Speech Recognition, Streamlit.

- Built a language converter application that listens to audio, converts text to another language, and produces text and audio outputs.
- Integrated Google Translate API for accurate translation and gTTS for generating high-quality audio outputs.
- Streamlined the workflow by combining speech recognition and translation in a single application, enhancing user experience.

GENERATIVE AI CONTENT CREATOR WITH LLM INTEGRATION

Technologies: Python, VS Code, Streamlit, Google Generative AI, Pillow, Textwrap, LLM

- Developed a content creation application integrating generative AI and LLM to produce text and image-based content.
- Created an interactive AI chat feature that showcases advanced AI capabilities for dynamic content creation.
- Leveraged Google Generative AI to enhance content generation and ensure seamless integration with LLM models.

GEMMA INTEGRATION FOR TEXT GENERATION AND DOCUMENT QA

Technologies: Python, LangChain, Groq, Hugging Face, FAISS, Transformers, GEMMA-2 9B

- Integrated GEMMA-2 9B model using Hugging Face and Groq for advanced text generation and document-based question-answering.
- Developed a system capable of processing and generating accurate responses from relevant document segments using LangChain and FAISS for similarity search.
- Implemented an interactive pipeline for generating content and answering queries based on document embeddings, showcasing the power of large language models (LLM) in real-world applications.

IMAGE GENERATION SYSTEM USING CLIP AND VQGAN

Technologies: Python, OpenAI CLIP, VQGAN, Neural Networks

- Integrated CLIP with VQGAN to convert text descriptions into high-quality images.
- Optimized model performance through data normalization, hyperparameter tuning, and advanced text encoding.
- Developed an iterative training loop with custom loss functions to refine image generation in real-time.
